CM5-X

TPV Android All-in-one

Dive into the new ITOS CM5-X, the Android 10 Smart POS that will create simpler and more personalised shopping experiences than ever before.

Our new payment device stands out for featuring enhancements that will bring the customer experience at the point of sale to the optimal point of sale. Thanks to its Quad-Core processor, Dual Wifi availability and new operating system, this solution guarantees a stable and fast connection to the network, as well as increased processing speed, reducing transaction times for both the business and the consumer. With integrated Pinpad and 1D/2D barcode scanner, the CM5-X will become the one-stop solution for your day-to-day business, unifying inventory management, sales processes and payment in a single device.

Features:

- Time optimisation and increased productivity
- Improved customer experience by integrating customised software and hardware
- Reduced paper consumption to help the environment

Multifunction Station

Integrates a thermal printer and serves as a base for hands-free reading of barcode labels.

Countertop

Makes charging more convenient. When you want to charge it, just place it on the charging base. And it's easy to take it out by pressing the button. Normally it is used together with the support.

Sectors of application

Success stories

- Hospitality and tourism
- Retail

The Smart POS CM5-X Android 10 brings numerous benefits. In the retail sector, it allows payments to be processed quickly and securely, reducing customer waiting time at the checkout. In the hospitality and tourism sector, its processor and dual wifi connection speed up order taking and payment processing. In addition, it makes it possible to manage payments, orders and reservations directly at the customer's location, without the need to rely on fixed infrastructure, thanks to its mobile POS features.

ITOS offers customised mobility and payment solutions, as well as a national maintenance service tailored to each customer's needs.
